

Connection Application Price Guide

1 July 2023 to 30 June 2024

Application	Service	GST inclusive (cost per premise or service)
Preliminary Enquiry	Preliminary Enquiry for all other connections related queries	\$515.53 [^]
	Preliminary Enquiry on Embedded Networks	\$283.53
100 Amps or less (New connection)	Basic connection offer - urban	\$23.35
	Technical assessment of new connection - urban off PT Pole OR urban service length >50m OR with land zone specified as 'other'	\$540.27
100 Amps or less (Existing Amalgamation)	Basic connection offer for existing site - urban amalgamation	\$23.35
	Technical assessment of existing site - amalgamation where land zoning is rural OR off PT Pole OR urban service length >50m	\$540.27
100 Amps or less (Existing Separation)	Basic connection offer for existing site - urban separation	\$23.35
	Technical assessment of existing site - separation where land zoning is rural OR off PT Pole OR urban service length >50m	\$540.27
100 Amps or less (Existing Alteration)	Basic connection offer for existing - urban alteration	\$23.35
	Technical assessment of existing site - urban off PT Pole OR urban service length >50m OR with land zoning is rural	\$540.27
100 Amps or less (New & existing rural)	Rural - technical assessment of new and existing rural sites for connection, alteration, amalgamation, or separation	\$540.27
> 100 Amps (New connection)	New connection - urban or rural	\$540.27

Application	Service	GST inclusive (cost per premise or service)
Embedded Generation (new or altered)	Embedded Generation connected via an inverter and non-inverter generation with no total power rating exceeding 10kW per phase (A B C) at any connection point to the Ausgrid network NOTE: For a multi-tenanted installation, the total embedded generation connected via inverter across the installation must be 30kW or less across all phases (A B C)	\$28.79
	Embedded Generation connected via an inverter and non-inverter generation, including existing, totalling more than 30kW across all phases (A B C) at any connection point to the Ausgrid network	\$1055.89^
	Embedded Generation connected via an inverter and non-inverter generation, including existing, less than 30kW across all phases (A B C) and not less than 10kW on any one phase (A/B/C) at any connection point to the Ausgrid Network	\$285.26^
Permanent Unmetered Supply (PUMS)	PUMS Customer Specific Expedited Contract	\$91.71#
	PUMS Negotiated Offer with load IDs and NMI provided	\$559.98^ #
	PUMS no load ID provided and/or 'New' PUMS customer type	\$817.74^ #
	PUMS Permanent disconnection	\$68.76#
Subdivision	Assessment of application for electricity supply to a land subdivision	\$540.27
Permanent Disconnection	to a Customer Connection	-
	to an Ausgrid Asset	\$540.27

Application	Service	GST inclusive (cost per premise or service)
Notification of Arrangement (NoA)	Provision of a letter confirming electricity supply arrangements for the premises / development have been satisfactorily completed NOTE: Additional charge (quoted service) may apply for an "Early" NoA issued prior to completion of network construction works	\$588.57
Street Light	Assessment of application to install public street lighting	\$540.27
Relocating a network asset	Assessment of application to relocate Ausgrid's network assets	\$540.27
# Includes charge for a audit Installation Inspection, and for PUMS permanent disconnection inspections this is a review of site photos provided by the Level 2 Accredited Service Provider		
^ This is an initial charge and could vary depending on complexity (quoted service)
